Certification

Master in Blockchain Development | Jetking Learning Center   Sept 2024
Certified SME - US healthcare Corrected Claim | Eviden   June 2024

Project

Online Portfolio website

- Developed an innovative 3D portfolio website showcasing roles, skills and work history.
- Made use of technologies such as ThreeJS, React Three Fiber, TailwindCSS, and Framer Motion for an engaging user interaction.
- Integrated email functionality to ensure seamless user communication and used Suspense and Preload techniques for optimal responsiveness.

Decentralized Crowdfunding Platform

- Decentralized crowdfunding platform using blockchain to innovate funding models, incorporating Solidity for smart contracts, React.js and Tailwind CSS for UX, and Thirdweb for a web3 environment.
- Ensured automated various critical aspects of crowdfunding campaigns, such as fund allocation, milestone-based payments, and the establishment of transparent, self-executing agreements. This groundbreaking approach significantly enhanced trust between User and contributors, fostering a more secure and efficient crowdfunding ecosystem.

Fake Product Identification using Blockchain

- Led blockchain solution development to secure product authenticity.
- Programmed and deployed secure smart contracts in Solidity for QR code generation/verification to ensure product integrity within the supply chain
- Designed a polished frontend with responsive Bootstrap user interface.
